Question 1

Incorrect

Mark 0.00 out of 2.00

Consider the following code snippet used to create a very small image.

im = np.zeros((3, 2), dtype=np.uint16)

Pixel values are

[[65500, 0] [0, 32768] [8192, 4096]]

What will be the value of pixel [0, 0] after
im = im + 99?

Answer: 63

The correct answer is: 64

Question 2

Incorrect

Mark 0.00 out of 2.00

The figure below shows a 2 × 3 image. This image is to be zoomed by 5 times using bilinear interpolation. Calculate the value of the resultant pixel at (4, 7).

200	20	160
140	80	60

Answer: 73

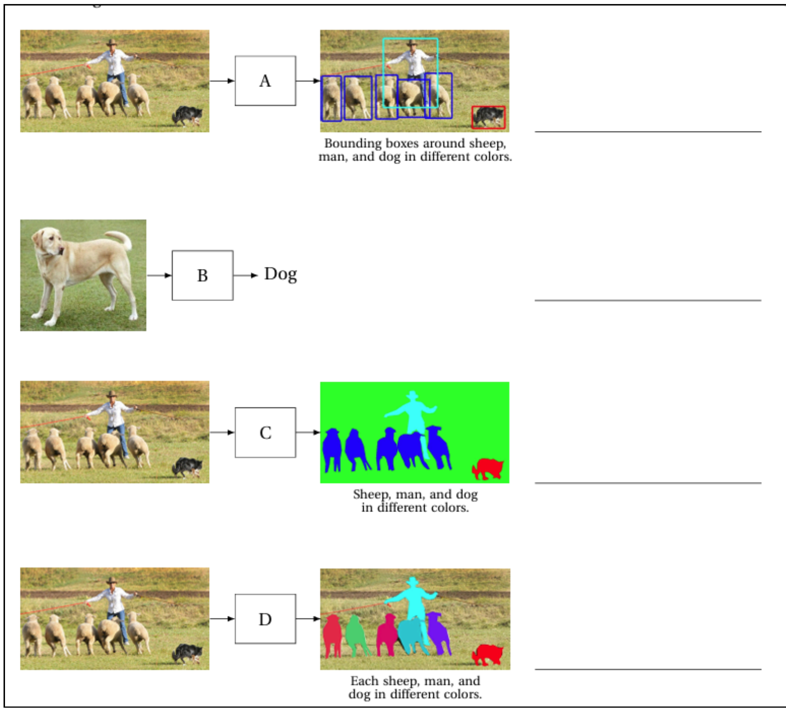
The correct answer is: 105

Question 3

Correct

Mark 2.00 out of 2.00

Identify the computer vision tasks by dragging and dropping.



Object detection

Image classification

Semantic segmentation

Your answer is correct.

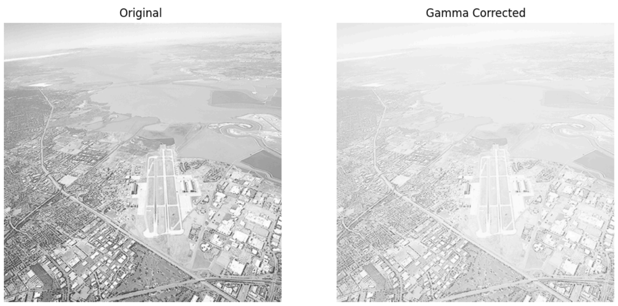
..nstance segmentation

Question 4

Correct

Mark 2.00 out of 2.00

The following figure shows an original image and its gamma-corrected versions. What could have been the gamma value, 0.1, 0.4, 2, or 5?



Answer: 0.4

The correct answer is: 0.4

Question 5

Correct

Mark 2.00 out of 2.00

In the process of histogram-equalization of the three-bit image shown below, to what will an input pixel with the value 6 map?

0	0	1	1	1	1	0	0	0	0	0	1
0	0	0	0	2	1	1	2	0	1	0	0
0	1	2	3	3	4	5	3	2	2	1	1
1	1	2	3	6	7	7	6	4	3	1	1
0	1	3	4	5	7	7	6	3	3	0	1
1	1	1	2	4	4	4	4	3	2	0	0
0	0	0	0	2	1	2	1	1	0	0	1
1	0	0	0	1	1	1	1	0	0	1	1

Answer: 7

The correct answer is: 7
